Professional Summary

Senior Software Engineer with 8+ years of experience designing and shipping distributed systems at scale. Specialized in Python, Go, and Kubernetes, with a track record of leading teams of 5–10 to deliver measurable infrastructure and platform improvements.

Experience

Staff Software Engineer — Acme Cloud (2021 – Present)

- Architected a multi-region Kubernetes platform serving 12M requests/sec, reducing p99 latency by 38%.
- Led a team of 7 engineers to migrate 40 legacy services to gRPC, cutting inter-service latency by 60%.
- Designed and shipped a cost-attribution system that reduced AWS spend by \$1.4M annually (22% reduction).
- Mentored 4 junior engineers; 3 were promoted within 18 months.

Senior Software Engineer — Globex (2018 – 2021)

- Built a real-time event pipeline (Kafka + Flink) processing 8B events/day with 99.97% uptime.
- Reduced deployment time from 45 minutes to 6 minutes by automating CI/CD with Argo Workflows.
- Owned the on-call rotation; cut P1 incidents by 40% over two years via runbooks and SLOs.

Software Engineer — Initech (2016 – 2018)

- Shipped a REST API in Go powering 2M MAU; maintained 99.95% availability over 24 months.
- Implemented OAuth 2.0 + JWT authentication across 6 internal services.

Skills

Languages: Python, Go, TypeScript, SQL

Frameworks: FastAPI, gRPC, React, Flask

Cloud: AWS (EKS, Lambda, S3, RDS), GCP (GKE, Pub/Sub)

Data: PostgreSQL, Kafka, Flink, Redis, BigQuery

Tools: Kubernetes, Terraform, ArgoCD, Datadog, Prometheus

Education

B.S. in Computer Science — UC Berkeley, 2016

Certifications

AWS Solutions Architect Professional · Certified Kubernetes Administrator (CKA)
