Professional Summary

Machine Learning Engineer with 6+ years of experience building production ML systems. Specialized in NLP, recommendation systems, and MLOps at scale. Track record of shipping models that move business metrics (engagement +18%, infra cost -25%).

Experience

Senior ML Engineer — Meta (2021 – Present)

- Designed ranking model serving 200M users; +12% engagement vs. baseline.
- Led migration of training infra to PyTorch + Ray, cutting iteration time from 6h to 28m.
- Built online feature store processing 50K QPS with p99 < 30ms.
- Mentored 3 junior engineers; published 2 internal tech blogs on MLOps.

ML Engineer — Spotify (2018 – 2021)

- Shipped Discover Weekly personalization; +6% session time.
- Built A/B test framework adopted by 14 teams.

Skills

Languages: Python, SQL, Scala

ML: PyTorch, TensorFlow, Hugging Face, scikit-learn, XGBoost

Infra: Kubernetes, Spark, Ray, Kafka, Airflow, MLflow

Cloud: AWS (SageMaker, S3, EMR), GCP (Vertex AI)

Education

M.S. in Computer Science — Stanford University, 2018

B.Tech in CS — IIT Bombay, 2016, GPA: 9.2/10

Publications

Sharma et al., "Efficient Retrieval-Augmented Generation at Scale", ACL 2023.
