Summary

Data Engineer with 6 years of experience building batch and streaming data pipelines at scale. Specialised in Spark, Kafka, and cloud data warehouses. Led the data platform team at a fintech serving 8M users.

Experience

Senior Data Engineer — OVO (2020 – Present)

- Designed the data lake on BigQuery + GCS; now ingesting 4 TB/day from 30+ sources.
- Built Kafka streaming pipelines for transaction events; p99 latency 8s.
- Reduced batch job runtime by 64% via partitioning and clustering.
- Mentored 4 junior engineers; ran weekly data engineering brown-bag.

Data Engineer — Traveloka (2018 – 2020)

- Migrated 12 ETL jobs from on-prem Hadoop to GCP Dataproc.
- Built Airflow DAGs adopted by 8 analytics engineers.

Skills

Python, Scala, SQL, Spark, Kafka, Airflow, dbt, BigQuery, Snowflake, GCP, AWS, Terraform, Docker, Kubernetes

Education

M.Sc. Computer Science — Institut Teknologi Bandung, 2018

B.Sc. Computer Science — Universitas Brawijaya, 2015
