Summary

Site Reliability Engineer with 8 years of experience operating large-scale distributed systems (peak 12K nodes, 4M QPS). Specialised in incident response, capacity planning, and observability. Led SRE team of 5 at Bukalapak.

Experience

Senior SRE — Bukalapak (2019 – Present)

- Owned SLOs for the payments platform; achieved 99.97% availability over 12 months.
- Reduced MTTR from 47 min to 12 min via unified alerting and runbooks.
- Migrated 4 critical services from VMs to Kubernetes; cost down 32%.
- Built internal chaos engineering platform; adopted by 9 services.

SRE — Gojek (2016 – 2019)

- On-call rotation for the matching service; handled 200+ P1 incidents.
- Built Prometheus dashboards adopted org-wide (200+ services).

Skills

Kubernetes, Terraform, Prometheus, Grafana, Go, Python, Linux, AWS (EKS, RDS, S3), GCP, Datadog, PagerDuty

Education

B.Sc. Computer Science — Universitas Gadjah Mada, 2015
